

## AMENDMENTS TO THE CLAIMS

Please amend Claims 1, 3 and 4 to read as follows, and cancel Claim 2 without prejudice to or disclaimer of the subject matter recited therein.

1. (Currently Amended) A conductive liquid crystal device comprising:  
a pair of oppositely disposed electrodes, and  
at least two organic layers including a planar liquid crystalline organic layer  
and an organic luminescence layer disposed between the electrodes,  
wherein the planar liquid crystalline organic layer has plural regions which  
are ~~in the same plane but~~ on at least one of the electrodes and have different  
electroconductivities, and  
wherein the organic luminescence layer emits luminescences by receiving  
charges supplied by the plural regions of the planar liquid crystalline organic layer having  
different electroconductivities, said different electroconductivities are effected by changing  
an alignment state of liquid crystal molecules in the planar liquid crystalline organic layer.

2. (Cancelled)

3. (Currently Amended) The device according to Claim ~~2~~ 1, wherein said  
plural regions have different alignment states of liquid crystal molecules and said different  
alignment states ~~of liquid crystal molecules~~ have been formed by laser light irradiation of  
the planar liquid crystalline organic layer.

4. (Currently Amended) The device according to Claim 2 1, wherein said plural regions have different alignment states of liquid crystal molecules and said different alignment states of ~~liquid crystal molecules~~ have been formed by voltage application to the planar liquid crystalline organic layer.

5. (Cancelled)

6. (Cancelled)
